Built for Modern Clinical Demands. Powered by AI.

Clinicians today face increasing administrative pressure, disconnected systems, and shrinking consultation time. Our AI medical transcription platform uses intelligent transcription and structured automation to streamline workflows, helping you deliver better care with less manual overhead.

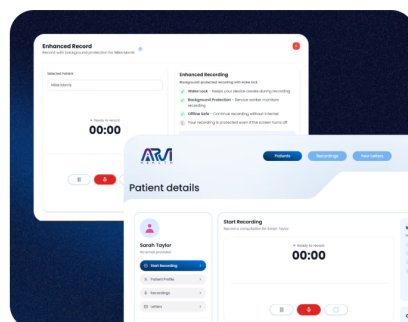

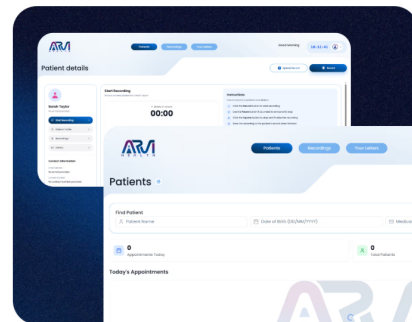

Powerful Tools. Practical Outcomes.

Patient Profile

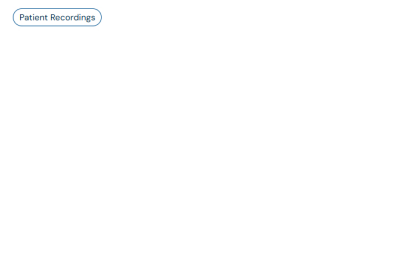

Know Your Patients, Not Just Their Charts

Access complete, up-to-date patient records in seconds, from vitals and history to investigations and summaries.

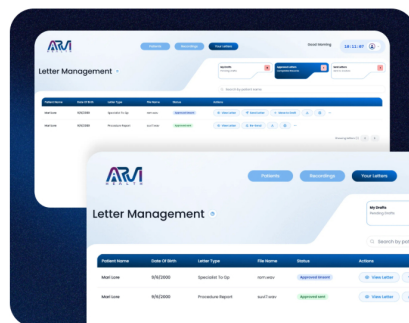

- Structured summaries to highlight key clinical information
- Quick access to past letters, test results, and consultations
- Secure, centralised data available at the point of care

Patient Recordings
